Travel enthusiasts will celebrate *The Traveler's Passport to the U.S.A. and Canada*. Designed to help travelers keep track of the American and Canadian states, provinces, and territories that they visit on road trips, *The Traveler's Passport* has an interesting and informative entry on each of these destinations that includes pictures of the flag, a welcome sign, the capital building or another government building, space for the user to write the date of the visit, and interesting facts like the capital, population, and area, along with the official bird, flower, and tree, as well as important commodities, a state nickname, and other trivia.

For ease of use, the entries are arranged in alphabetical order, each with its title and a date-visited space color-coded according to its region. Colored outline maps of the U.S.A. and Canada help the user to locate states and provinces. Travelers keep a record of their visits by using a highlighter pen to color in locations they have visited.

In the back of the book, users will find fill-in-the-blank trivia questions, brief expressions in French and Spanish, and pictures of state and provincial license plates with corresponding boxes to check. A final section provides notes, contact information, and space for commemorative stamps. This 2020 edition has Questions and Answers at snipe-international.com under "education" on our web site.
